

Nexus 5X Back Panel Replacement

This guide will show you how to remove the back panel of the Nexus 5X.

Written By: Isaiah Schultz

INTRODUCTION

Please make sure your phone is turned off and the SIM card is removed prior to starting this guide.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [SIM Card Eject Tool](#) (1)
-

Step 1 — Back Panel

- Insert a SIM card ejection tool into the SIM card slot located on the left edge of the phone.
- Press in with the tool of your choice until it pops out of the side of the phone.
- Remove the SIM card slot tray and set aside.

Step 2

- Starting at the SIM card slot, stick the plastic opening tool in between the back panel and the phone.
- Slide the opener tool gently around the phone until you hear clicks and visibly see the panel separate from the body of the phone.
- Continue this process on each edge of the phone, until the only thing holding the back panel to the body of the phone is the fingerprint scanner.

Step 3

- Gently detach the back panel from the finger print scanner on the back of the phone.

To reassemble your device, follow these instructions in reverse order. If your back panel is damaged or broken, then install the new panel instead.
